Modern tools helping to care for
SHEEP AND LAMBS

EAR TAGS & ELECTRONIC ID

Ear tags help farmers identify each sheep. They can track health and any sheep movement between farms.

PREGNANCY SCANNING (ULTRASOUND)

from 45–65 days of gestation
Shepherds learn whether or not the ewe is pregnant; how many lambs she is carrying (single, twins, triplets); if the lambs look healthy

ADOPTER PEN

helps a ewe accept a lamb that isn't her own
keeping the ewe and lamb close together
helping the lamb smell like the ewe (helps bonding)
giving them quiet space to get used to each other

WEIGH CRATE

a safe pen that helps farmers weigh sheep & lambs.
used to: check if lambs are growing well ~ plan feeding ~spot illness early

WARMING BOX

For hypothermic lambs: safe, warm easy clean,

HEAT LAMP

for warmth

FEEDING TUBE

helps weak lambs get warm milk until they can drink themselves.

DOSING

vaccines and injections to protect sheep from disease
